

Cellsafe® Radi Chip® is designed to suit specific models of phones. Ensure you have purchased the correct model Cellsafe® Radi Chip® for your phone. Please read these instructions carefully before applying your Cellsafe® Radi Chip® as correct placement of the Cellsafe® Radi Chip® is essential.

Before you begin you must ensure the back of your phone is clean and free of any dirt, dust, lint or oils from your hand. Failure to properly clean the back of your phone may mean the Cellsafe® Radi Chip® does not properly adhere.

1) Please clean the back of your phone with a non-abrasive cleaner, we recommend using

an alcohol swipe. You should also ensure your hands are clean before you begin. The back of your phone must then be dry.

2) Slowly peel the adhesive backing paper from the Cellsafe® Radi Chip®.

3) Gently and carefully adhere the Cellsafe® Radi Chip® to the back of your phone aligning it in accordance with the placement diagram for your model of phone.

IMPORTANT: Your Cellsafe® Radi Chip® must not be exposed to extreme heat or moisture, both of these can cause serious damage to the chip.

Instructions on how to apply the Cellsafe® Radi Chip®

Radi Chip®

Reducing exposure

from mobile phone radiation

A Chip position on iPhone 5/5S/SE
B Chip position on iPhone 6/6S
C Chip position on iPhone 6+/6S+

Cellsafe® Radi Chip® range for iPhones 5 and 6 range

A Chip position on the iPhone 7
B Chip position on the iPhone 7+

Cellsafe® Radi Chip® range for iPhone 7/7+ range

A Chip position on S6/S6 Edge
Earlier models of Samsung Galaxy phones use the small Android model chip.

Cellsafe® Radi Chip® range for Samsung Galaxy S6 / S6 Edge

Cellsafe® Radi Chip® suitable for most small Android Smart phones

A Chip position on Galaxy S5
B Chip position on other small Androids (Galaxy S4, HTC, Nokia, Blackberry).
Whilst the small Android chip is designed to suit most small Android smart phones, correct placement of the chip is essential. Unfortunately the design of some models of phones do not allow the chip to be placed in its most effective location.

Cellsafe® Universal Radi Chip® suitable for S7, S7 Edge, S8

A Chip position on Samsung Galaxy S7
B Chip position on Samsung Galaxy S7 Edge
C Chip position on Samsung Galaxy S8
Whilst the New Android chip is designed to suit most larger Android smart phones, correct placement of the chip is essential.

Cellsafe® Universal Radi Chip® suitable for S8+, Oppo & Huawei

D Chip position on Samsung Galaxy S8 Plus
E Chip position on Oppo
F Chip position on Huawei
Unfortunately the design of some models of phones do not allow the chip to be placed in its most effective location (ie: rear speaker positioning and sliding phone designs). If you are unsure, please check with us.
